

Funding Initiative

Researching Research – Summer Schools and Workshops

Profile area: Understanding Research

Deadline: once or twice a year, see website

Within the frame of „Research Research“, the Volkswagen Foundation offers funding for workshops and summer schools that aim to reflect, combine, and experiment with the various methodological approaches or theoretical challenges in the area of research on research.

Disciplines conducting research on research

Summer schools and workshops

Researchers at German universities or research institutions, international co-applicants possible

Events aim to address young researchers in Germany

1 Objectives

By funding research on research, the Volkswagen Foundation aims to support the creation, reflection and strategic application of knowledge about the realm of science. With this it seeks to promote an open, inclusive, and diverse research culture and thus to generate positive effects on the future research system.

Therefore, the Foundation offers funding for workshops and summer schools that aim to reflect, combine, and experiment with the various methodological approaches or theoretical challenges in the area of research on research. Respective events are meant to introduce early career researchers from various disciplines to research on research and to enhance the participants' skills and knowledge in this area. The funding scheme is designed to strengthen research on research as an interdisciplinary and methodologically diverse research field and to build up and expand respective expertise, especially among early career researchers in Germany.

2 Scope of Funding

The program is open to all scholars from diverse disciplinary backgrounds working on questions or topics relating to research on research. Hence, it also addresses researchers who are not a priori anchored, e.g., in Science and Technology Studies or Higher Education Studies, but who are dealing with questions around the structure and functioning of research and the research system. It is, however, expected that the topic or subject of the proposed event builds on current discussions, developments and trends in the area of research on research and acknowledges the state of the art, also in international perspective.

Funding will be provided for workshops and summer schools which offer opportunities for doctoral and postdoctoral researchers to acquire additional expertise, methodological skills, and knowledge about ways of working perspectives and insights that are crucial for further development of the research field. Events primarily addressing more experienced researchers may also be supported if a clear and convincing explanation is provided. It is possible to apply for funding for a single event or a series of events with up to three events that build on each other thematically. The event must take place in Germany; however, inclusion of international researchers as co-applicants or lecturers is explicitly welcomed.

In order to ensure a productive and inspiring working atmosphere, the group of participants should be limited to 35 persons, including lecturers. Normally, a workshop will be held for two to three days and a summer school for up to ten days. The intended participants should reflect the multidisciplinary character of the research field.

Generally excluded from funding are summer schools or workshops within established event series or regularly recurring meetings, follow-up or new versions of previous events, or the continuation of funding for an event series previously supported by another funding body. Likewise excluded from funding are events with pro-rata funding from another funding body or activities within the framework of Research Training Groups, Clusters of Excellence or coordinated funding from other sources.

This is not an open topic program to fund scientific events; proposals missing a link to research on research cannot be considered for funding.

General Information

The Foundation cannot be held responsible for any obligations entered into prior to the receipt of grant approval.

Applications that have been or are intended to be submitted in this or a similar form to another funding organization will not be processed by the Foundation. Applications that do not meet the formal requirements will not be submitted for review. The Foundation can only award funds to scientific institutions.

3 Application and Selection Procedure

The program addresses researchers of all career stages from postdoc level onwards based at universities or research institutions in Germany. A joint application with international researchers is possible.

3.1 Time schedule

Proposals may be submitted on one or two dates per year; upcoming application deadlines are announced on the Foundation's website. To allow applicants to plan ahead and organize logistics well in advance, proposals ought to be submitted at least **nine months** before the date set for the event. Generally, applicants will be informed about the funding decision three to four months after the deadline.

3.2 Procedure

Proposals will be evaluated by a small committee comprising members of the Foundation's office and external experts. Amongst others the following criteria will be considered:

- Reflection of current trends and developments in the field "research on research".
- Discussion of methodological or theoretical challenges.
- Appropriate composition of the group of participants.

4 Application Checklist

Applications have to be submitted online via the Volkswagen Foundation's electronic application system. Please limit the number of applicants registering in the Electronic Application System to two persons, additional project partners may be listed in the template for the proposal.

4.1 Electronic Application – Instructions

Please read the information about the electronic application system on the website of the Volkswagen Foundation prior to submitting your application. Information can be found at "[Electronic Application System – Instructions and Tips](#)". It is important that applicants register all

involved parties early on in the process. Without a user profile it is not possible to invite co-applicants or to submit an application.

If you have technical questions about using the electronic application system, please contact support@volkswagenstiftung.de.

4.2 Application documents e.g.

Applications must be submitted in English. The following files (.pdf) are required:

- Proposal and further explanations. Please use the template provided for download.
- Preliminary program highlighting topics to be discussed and chosen formats for presentations and teaching. Please add a preliminary list of speakers indicating who already confirmed participation
- CVs of the applicants, please use the template provided for download. In case of multiple applicants please merge all CVs into a single file.
- Information on the proposed budget and respective explanations must be provided within the electronic application system.

4.2.1 Proposal according to the template file

Please use the [Template Proposal](#).

4.2.2 Curriculum Vitae of every applicant

Please submit your scientific career in tabular-narrative form. Please use the [Template CV](#).

4.2.3 Budget Plan

Please note that funding is only granted to one institution, which is why you should submit a joint budget plan even in case of multiple applicants.

Funds may be requested to cover the following types of expenses:

- Accommodation and catering costs, rent of premises.
- Travel expenses of participants.
- Childcare costs during the event.
- Budget for graduate or undergraduate research assistants to support the preparation and implementation of the event.
- Up to 500 euros for material expenses (e.g., working materials).

The following costs cannot be covered:

- Costs for scientific personnel, coordinators or administrative staff.
- Cost for publications like monographs or edited volumes.

- Cost for honoraria and lecture fees (in exceptional cases, an expense allowance may be requested for speakers outside academia, public administration or business, e.g. self-employed persons).
- Expenses for accompanying persons.
- Expenses for participants from industry.
- Costs for social programs.
- Lump sum for overheads costs.
